OBJECTIVES

Help social workers to play a key role in addressing climate change issues for and with the most vulnerable population;

Create a European competency framework and an online training program to improve the skills of social workers in prevention and adaptation to climate change impacts;

Support social workers in the development of local active partnership and of collective initiatives to confront climate change issues.

"people who are socially, economically, culturally, politically, institutionally or otherwise marginalized are particularly vulnerable to climate change as well as to some adaptation and mitigation strategies.

(IPCC – Intergovernmental Panel on Climate Change)

INTELECTUAL OUTPUT (IO)

IO 1: Local stakeholders guide, public and private;

IO 2: Virtual resources and communication networking center;

IO3: E-course on climate change phenomena and their consequences in europe;

IO 4: E-course on social cohesion through collective action;

IO 5: Tool box / educational kit on social worker facing climate change.

ACTIVITIES

Joint staff training of operators / trainers from Belgium, France, Italy, Greece and on the following topics: adaptation of the population to climate changes; strategies for the reduction of territorial vulnerability;

Local dissemination of the experience and methodologies used in the different countries, though face to face meetings and remote communication (web, social media …);
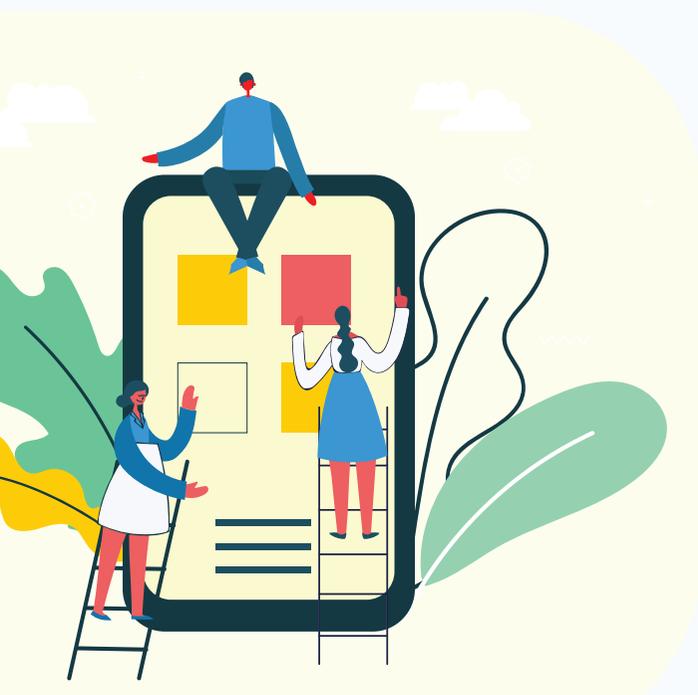

Final event with conference in Brussels.
