

OBJECTIVES

Help social workers to play a key role in addressing climate change issues for and with the most vulnerable population;

Create a European competency framework and an online training program to improve the skills of social workers in prevention and adaptation to climate change impacts;

Support social workers in the development of local active partnership and of collective initiatives to confront climate change issues.

“ people who are socially, economically, culturally, politically, institutionally or otherwise marginalized are particularly vulnerable to climate change as well as to some adaptation and mitigation strategies.

(IPCC – Intergovernmental Panel on Climate Change)

INTELLECTUAL OUTPUT (IO)

IO 1: Local stakeholders guide, public and private;

IO 2: Virtual resources and communication networking center;

IO3: E-course on climate change phenomena and their consequences in Europe;

IO 4: E-course on social cohesion through collective action;

IO 5: Tool box / educational kit on social worker facing climate change.

ACTIVITIES

Joint staff training of operators / trainers from Belgium, France, Italy, Greece and on the following topics: adaptation of the population to climate changes; strategies for the reduction of territorial vulnerability;
